

LSP TRADING TELEGRAM BOT

Simple Pocket-Sized User Guide & Standard Operating Procedure (SOP)

Learn how to control your entire algorithmic trading system right from your phone.
No confusing stock market terms. Everything explained so simply that anyone can follow.

**Tap One Button · Stay 100% Safe · Watch
Your Money Grow**

Built on Zerodha Kite Connect & AWS Cloud
Architecture

 **100% Beginner Friendly**

 **2-Step Safety Modals**

 **50ms Emergency Stop**

What Is This App?

Three simple lines that tell you everything you need to know.

1. It is a smart robot helper inside your phone.

It lives inside your regular Telegram app just like a friend you chat with.

2. It watches stock prices so you don't have to.

It scans the market every second and follows 5 strict rules to keep your money safe.

3. You control everything by tapping friendly buttons.

No typing complicated computer code. Just tap big buttons with your thumb.

THE THREE SACRED GOLDEN RULES

Always Wear a Helmet

The robot NEVER buys anything without placing an instant safety net (Stop-Loss).

You Hold the Brake

If you ever feel scared, one tap on the Big Red Kill Switch stops everything in 50ms.

Double Check First

Before doing anything with real money, the robot asks you: "Are you really sure?"

HOW EVERYDAY LIFE LOOKS WITH THIS APP

At 9:00 AM, tap [ **Broker Hub**] and unlock the app. At 9:28 AM, the robot measures the morning price. If it sees a safe trade, it buys, sets a profit goal (+25 points), and automatically locks in your money. At 3:30 PM, you tap [ **Ledger & EOD**] to see your daily earnings picture card!

Remember: You never have to rush. The robot handles all fast split-second math for you.

Map of the App

Here is the 1-thumb button pad pinned right above your phone keyboard.

MOBILE QUICK-ACTION KEYBOARD (TAP ANY BUTTON WITH YOUR THUMB)

/status	/positions	/margins
[1] Broker Hub	[2] OMS Orders	[3] Strategy
[4] RMS & Risk	[5] Ledger & EOD	[6] System
/precheck	/kill (STOP)	Hide Menu

THE 6 MAIN DEPARTMENT ROOMS

1

Broker Hub (Your Bank & Key)

Login with Zerodha, check how much cash is in your wallet, and see session status.

2

OMS Orders (The Order Desk)

Switch between practice or real cash, change profit target (+25 pts), or sell now.

3

Strategy (The Robot Brain)

Choose NIFTY or BANKNIFTY, check 9:28 anchor prices, and start the scanner.

4

RMS & Risk (The Safety Shield)

Set daily loss limits, watch the profit stairs climb, and check the circuit breaker.

5

Ledger & EOD (Your Money Diary)

See completed trades, tax bill, partner 50/50 profit split, and daily report photo.

6

System (The Health Doctor)

Run the 7-test preflight healthcheck, test internet speed, and inspect cloud server.

Remember: To bring this keyboard back anytime, just type **/menu** in your chat.

Broker Hub

Where the robot connects safely to your Zerodha account.

WHAT IT IS

The connection door where you link your Zerodha account each morning.

WHY YOU USE IT

To unlock trading for the day and check how much pocket money you have.

HOW TO USE (5 STEPS)

1

Tap [🔑 Broker Hub]

Opens the bank and key submenu.

2

Tap [/login]

Logs into Zerodha automatically with your safe security token.

3

Tap [/margins]

Shows your available shopping cash (e.g. ₹23,050).

4

Tap [/session]

Checks if the green connection light is smiling.

5

Tap [/logout] (Optional)

Locks the door at the end of the day. Asks for confirmation!

REAL-LIFE EXAMPLE

You added ₹23,050 to Zerodha. Tap [/margins]. The bot replies: "Available Cash: ₹23,050.00" in bright green.

WHAT TELEGRAM SHOWS

LSP Trading Bot BOT

Profile

3 Reconnect

Logout

Callout Guide:

- [1] Shows your connection is smiling green.
- [2] Your wallet balance ready for trading.
- [3] Quick buttons to refresh or disconnect.

Remember: You only need to login once every morning before 9:15 AM.

Strategy Logic

Where the robot analyzes prices and decides when it is safe to buy.

WHAT IT IS

The mathematical brain that follows 5 strict safety rules before buying.

WHY YOU USE IT

To select what to trade (NIFTY) and turn on the automatic price scanner.

HOW TO USE (5 STEPS)

1

Tap [Strategy]

Opens the strategy and scanner control board.

2

Tap [/asset]

Pick what index you want: NIFTY, BANKNIFTY, or SENSEX.

3

Tap [/strikes]

Shows the 9:28 anchor price and contracts the robot picked.

4

Tap [/gates]

Checks if the morning time gates (SC1 to SC4) are open.

5

Tap [/scan_start]

Turns on the live price scanner to watch for setups!

REAL-LIFE EXAMPLE

At 9:28 AM, the bot measures NIFTY anchor spot at 24,800. It picks the 24,800 CE option at ₹150.00 and prepares for safe entry.

WHAT TELEGRAM SHOWS

LSP Trading Bot BOT

STRATEGY TELEMETRY (NIFTY)

09:28 Anchor Spot: 24,800

Selected Contract: NIFTY24800CE

Contract Premium: ₹150.00

Timing Gates (SC1–4): ALLOWED

Scanner Status: WATCHING TICKS

Scan Active

Strikes

Gates

Scan Stop

Callout Guide:

- [1] The anchor price captured at exactly 09:28 AM.
- [2] Timing gates confirm whether trading is allowed.
- [3] Quick buttons to inspect or stop scanning.

Remember: The robot never guesses; it only moves if all 5 safety rules agree.

OMS Orders

Where you manage live orders, switch modes, and take profits.

WHAT IT IS

The order desk where trades are sent, repriced, or closed at market.

WHY YOU USE IT

To choose practice or real money, set target points, or sell immediately.

HOW TO USE (5 STEPS)

1

Tap [🗡️ OMS Orders]

Opens the order execution board.

2

Tap [/mode]

Pick Practice ('paper') or Real ('full'). Real asks to confirm!

3

Tap [/orders]

See today's open order slips and trigger pending safety nets.

4

Tap [/target 25]

Sets your winning prize goal to +25 points (repices order in 50ms).

5

Tap [/squareoff]

Closes the active trade right now at current price to lock profit!

2-STEP SAFETY INVARIANT

If you tap [/mode full], the bot stops and asks: "⚠️ Real Capital at Risk! Confirm?". It never risks money by accident!

WHAT TELEGRAM SHOWS

LSP Trading Bot BOT

1

⚠️ **CONFIRM LIVE EXECUTION (FULL)**

Real capital will be traded on NSE exchange:

Available Cash: ₹23,050.00

Daily Loss Limit: ₹5,000.00

Safety Preflight: 7 Gates Passed

2

🚀 Confirm Live

🛑 Stay Safe (Cancel)

3

🎯 Target: +25

⚡ Square-Off

Callout Guide:

- [1] Safety modal showing available balance before live trading.
- [2] Confirms 7 preflight gates are green.
- [3] Two buttons: Green to confirm, Red to stay safe.

Remember: If you try to cancel a protective stop-loss, the bot blocks you unless you confirm!

RMS & Risk Governance

Your guardian angel that stops you from losing more money than planned.

WHAT IT IS

The risk management shield that guards your wallet against bad market days.

WHY YOU USE IT

To check your daily loss budget and watch the automatic profit stairs climb.

HOW TO USE (5 STEPS)

1

Tap [RMS & Risk]

Opens the risk management dashboard.

2

Tap [/rms]

Inspects daily loss budget, trades remaining, and breaker status.

3

Tap [/ratchet]

Shows Multi-R profit stairs: +25, +50, +75, and +100 milestones.

4

Tap [/budget]

Shows how much of your daily ₹5,000 loss budget remains.

5

Tap [/reset_rms] (Admin)

Clears a tripped breaker if authorized by admin (asks to confirm!).

THE MULTI-R PROFIT STAIRS

When price gains **+25 pts**, safety net moves to **+20 pts**. You are guaranteed at least **+₹1,300 profit** even if market reverses!

WHAT TELEGRAM SHOWS

LSP Trading Bot BOT

RISK MANAGEMENT SHIELD

Daily Loss Budget: ₹5,000 ²

Remaining Risk Buffer: ₹5,000.00 (100%)

Consecutive Losses: 0 / 2 allowed

Circuit Breaker: ● **NOMINAL (Clear)**

Profit Stairs Active: **STEP-LADDER (Multi-R)**

Status

Stairs

³ Budget

Drawdown

Callout Guide:

- [1] Daily budget limits maximum possible risk for the day.
- [2] Breaker turns red if 2 losses occur, stopping any new trades.
- [3] Quick buttons to inspect stairs or loss drawdowns.

Remember: The profit stairs only climb up — they can never slide down or loosen your risk!

Ledger & EOD

Where every single rupee won, spent, or saved is written in ink.

★ WHAT IT IS

Your financial diary recording completed trades, taxes, and final balance.

📷 WHY YOU USE IT

To see today's win rate, check your tax bill, and view your daily photo card.

🐾 HOW TO USE (5 STEPS)

1

📅 Tap [📅 Ledger & EOD]

Opens the trade diary and audit room.

2

📄 Tap [/ledger]

Shows today's completed trades, buy prices, and sell prices.

3

📄 Tap [/charges]

Calculates exact broker brokerage, government STT, and GST bill.

4

💖 Tap [/capital]

Shows 50/50 partner profit sharing breakdown down to the rupee.

5

📷 Tap [/eod]

Sends a colorful high-resolution report card photo right in chat!

📊 SAMPLE DAY AUDIT NUMBERS

- Added: ₹23,050 | Withdrew: ₹500
- Trading Profit: +₹3,025 | Fees: -₹500
- Net Gain: +₹2,525 | Final Balance: ₹25,075

CSV Export

Callout Guide:

- [1] Shows your starting money and pure trading winnings.
- [2] Fees and taxes deducted clearly.
- [3] Download your full trade diary as an Excel/CSV file anytime.

Remember: [/charges] audits government STT, GST, and SEBI fees to the exact single paise!

System Health

Where you check if the computer, internet, and database are healthy.

WHAT IT IS

The doctor's clinic that monitors the cloud computer on AWS Mumbai.

WHY YOU USE IT

To run the 7-test morning preflight healthcheck and verify speed.

HOW TO USE (5 STEPS)

1

Tap [System]

Opens the cloud doctor and diagnostics room.

2

✓ Tap [/precheck]

Runs the 7-Gate morning health exam (Vault, Broker, Clock, etc.).

3

Tap [/system]

Shows EC2 cloud CPU %, RAM memory, and disk space.

4

⚡ Tap [/latency]

Checks price tick speed (ticks arrive in under 50 milliseconds!).

5

Tap [/logs]

Reads the computer's last 15 activity lines to ensure peace of mind.

THE 7-GATE PRECHECK RULE

If any of the 7 gates fails (e.g. internet down), the bot refuses to trade real money. Your cash stays 100% protected!

WHAT TELEGRAM SHOWS

 **LSP Trading Bot** BOT

1

Verdict:

READY FOR LIVE TRADING

✓ Precheck

⚡ Latency

3  Logs

 Restart

Callout Guide:

- [1] Every gate must show green before live trading is allowed.
- [2] Ultra-low latency guarantees fast order execution.
- [3] Quick buttons to view logs or test speeds.

Remember: Run [/precheck] at 9:00 AM every morning to make sure everything is smiling!

Common Tasks

Simple recipes for what you want to do on your phone in under 10 seconds.

1. Check My Money in 5 Seconds

1. Open your Telegram bot chat.
2. Tap [ /margins] on your bottom keyboard.
3. Bot replies with your available shopping cash (e.g. ₹23,050).

2. Practice with Fake Toy Money

1. Tap [ OMS Orders].
2. Tap [/mode paper].
3. The bot switches to Paper Mode. Zero real rupees at risk!

3. Switch to Real Money Safely

1. Tap [ OMS Orders] → tap [/mode full].
2. Bot shows a yellow safety modal with your balance.
3. Tap [ Confirm Live] to arm real trading.

4. The Big Red Brake (I'm Scared!)

1. Tap [ /kill] on your keyboard.
2. Tap [ YES, FLATTEN ALL].
3. All trades close in 50ms and the bot goes to sleep!

5. Get My Daily Report Card

1. At 3:30 PM, tap [ Ledger & EOD].
2. Tap [/eod].
3. Bot sends your colorful profit summary photo.

6. Hide or Show the Buttons

- To hide buttons: Tap [ Hide Menu].
- To bring buttons back: Type /menu and hit send.
- Your keyboard restores instantly!

PRO-TIP FOR EMERGENCY SITUATIONS

If market moves wildly and you want zero delay, type **/kill force** directly.

The robot skips the confirmation question and sells everything in **under 40 milliseconds!**

Remember: You can practice in Paper Mode as long as you want until you feel 100% confident!

Colour & Symbol Guide

What every emoji, colour, and button icon means in plain English.

Symbol	Name	What It Means In Plain English
	Green Circle	Everything is happy, connected, working normally, or money was won!
	Red Circle	Danger, disconnected, trade closed at safety net, or breaker tripped.
	Yellow Circle	Waiting, thinking, or warning you to double check before proceeding.
	Safety Shield	Your RMS guardian watching your back so you don't lose too much.
	Target Bullseye	Your winning points goal (e.g. +25 points profit).
	Profit Stairs	The Multi-R Ratchet moving your safety net higher as price climbs.
	Siren Light	Emergency stop warning! High priority action required.
	Money Bag	Cash inside your Zerodha wallet ready for shopping.
	Crossed Swords	Order desk ready to buy or sell contracts.
	Keyboard	Button to hide or show your mobile thumb control pad.

Remember: Green means safe and happy; Red means stopped or protected!

? Frequently Asked Questions

Simple, honest answers written for complete beginners.

1. What happens if my phone dies during a live trade?

Nothing bad! The robot lives on a dedicated cloud computer on AWS Mumbai. It watches prices and executes your profit exit or safety net even if your phone is completely off.

2. Can the robot lose all my money in one trade?

Never. Rule 5 caps every trade's risk to 25–35 points, and the daily safety shield stops everything if your ₹5,000 daily budget is reached.

3. How does the robot know when to sell?

It follows strict rules: when your target (+25 points) hits, it sells in 50 milliseconds. If the market climbs fast, the profit stairs trail higher to capture extra gains.

4. Why does the bot ask me twice when I tap Live Mode?

Because real money is sacred. Asking twice ensures you never accidentally switch into live trading while your phone is in your pocket.

5. What is the difference between Paper Mode and Full Mode?

Paper Mode uses fake simulation points for learning. Full Mode uses your real Zerodha cash balance to buy and sell on the actual NSE exchange.

6. Can I stop trading early if I made good profit?

Yes! Tap `[/squareoff]` to take your money home, then tap `[/scan_stop]` to let the robot rest for the day. You can enjoy your afternoon!

7. Where does my profit money go?

It stays safely inside your regulated Zerodha trading account. You can withdraw it to your HDFC/ICICI bank account anytime with one tap on Kite.

Remember: If you ever feel unsure, you can always ask your admin or tap the Kill Switch.

Daily SOP Routine

Your simple daily morning, afternoon, and evening routine checklist.

Morning Routine (09:00 AM – 09:15 AM)

1. Open Telegram → tap [ **Broker Hub**] → tap [**/login**].
2. Tap [ **System**] → tap [**/precheck**]. Ensure all 7 gates show green  .
3. Tap [ **/margins**]. Confirm cash balance (e.g. ₹23,050).

Anchor & Scanner Time (09:28 AM – 09:30 AM)

1. Robot records 09:28 anchor price automatically.
2. Tap [ **Strategy**] → tap [**/strikes**] to verify ATM selection.
3. Tap [**/scan_start**] to begin scanning for setup entries.

Market Hours (09:30 AM – 03:00 PM)

1. Relax! The bot sends audio/telegram cards on trade entry.
2. Profit stairs lock gains (+25 pts → +20 pts floor).
3. If happy with profit early, tap [**/squareoff**] to bank gains.

Post-Market Wrap-Up (03:30 PM)

1. Tap [ **Ledger & EOD**] → tap [**/eod**] to get your photo report card.
2. Tap [**/charges**] to audit taxes and broker fees.
3. Tap [**/capital**] to review 50/50 partner profit splits.
